

MINI DOOR LOCK SET

TE12LB600

Ideal for smaller container doors.
Uses 22mm dia. pipe (not included).
Finished in electro zinc plating.

ROD LOCK ASSEMBLIES

TE12L770-2 (2 WAY)

TE12L770-3 (3 WAY)

Operated by a T key or suitable outside handle with 8mm square spindle. Zinc plated mild steel. Rods are 10mm x 1145mm long: centre of pivot to end. Throw of rods = 35mm

ROD ASSEMBLIES

TE12L785

To suit TE12L6661 "Drop T" Flush Lock.
Rods are 10mm x 1145mm long: centre of pivot to end.
2 rods, 2 guides and 2 bolts and nuts.

BONNET STAY

TE12M10

A simple and extremely popular design with 'draw' of approx 216mm with mounting brackets which can swivel freely. It locks in the extended position and a further slight extension then frees the mechanism, allowing it to be closed.

Length between fixing centres is 266mm (closed) and 485mm (open) – not including bracket.

COMPARTMENT LOCK

TE12L44019

Complete with pronged washer and fixing nut

PLASTIC MOULDED HANDLE

TE12M60

A clever design, moulded in black polypropylene with integral snap-shut sections to conceal fixing holes. Under proof test conditions these handles withstood loads of over 250kg before serious deformation.
