Multi volt 10-30v

E-mark (E4) certified

100% Submersible

Stainless steel fasteners

9m core cables or 400mm tails

Twin number plate lamp orientation on right hand lamp

CM's 370 Series LED lamps are designed to be an easy-to-fit trailer lighting solution that can be fitted in a range of orientations. Box trailers need lamps to fit in a horizontal orientation and shine the number plate light across the trailer, while boat trailers need a number plate lamp that shines out of the wide side of the lamp downwards. In a design solution, these lamps have number plate lamps fitted to one short and one long side of the right hand lamp, with the installer simply connecting whichever of the tow number plate function wires that suits their application best. The fact that they look good, have cable length options, are submersible, and E-marked, makes them a first choice for many trailer builders.

BL370 series Lamps incorporate an E approved in-built reflex reflector. E mark compliance is also marked on the tough, high impact resistant polycarbonate lens.

In a design solution, these lamps have number plate lamps fitted to one short and one long side of the right hand lamp.

PART NO	CABLE LENGTH	NUMBER PLATE LIGHT
BL3702	400 mm	No
BL37029	9 metre	No
BL3703NP	400 mm	1 x short side & 1 x long side
BL3703NP9	9 metre	1 x short side & 1 x long side
