MULTIFIT MASTER

DUAL AUTO-SELECT COUPLING

AUTOMATICALLY ENGAGE WITH
1 7/8" AND 50mm TOWBALLS

Part No: TE4C698Z

**NO MORE
RATTLES**
incorporates
SILENTRIDE™
noise dampener,
eliminating the need
for anti-rattle
screws.

Part No: TE4C600Z

Introducing the new generation Multifit Master Dual Auto-Select Coupling

AUTO-SELECT

When towing a trailer, you need to be confident the trailer coupling is attached securely.

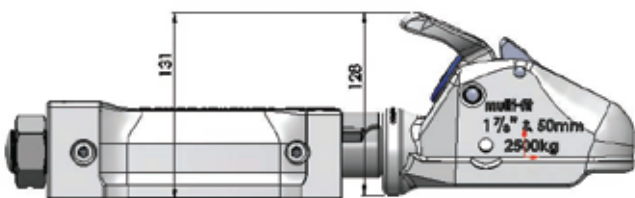

Multifit Master Dual Auto-Select Coupling is designed to automatically select and engage securely with either 1 7/8" or 50mm towballs.

All internal surfaces are CNC precision machined to ensure the ball fits accurately every time.

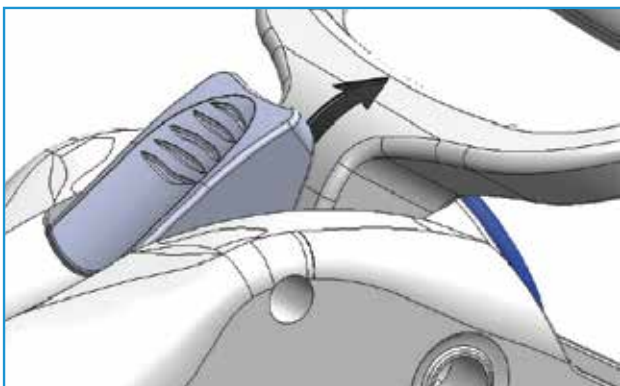

LOW HEIGHT

The Multifit Master Dual Auto-Select Coupling has been designed with an overall height of 131mm to avoid coming into contact with the tail door of some utility vehicles when opened.

SAFE & SECURE

The SecuraLok™ safety catch is precision cast from marine quality stainless steel 316 and is easy and intuitive to operate.

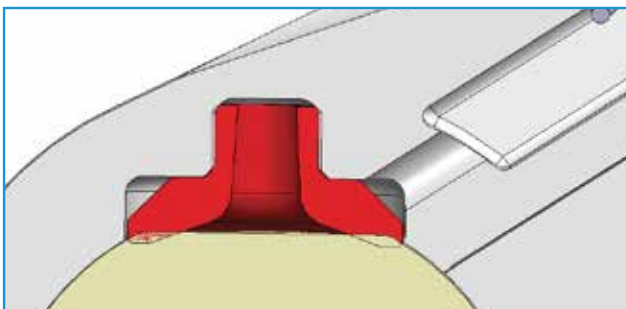

STRONG

The Multifit Master Dual Auto-Select Coupling is precision machined from longer lasting and better wearing SG Iron to help extend the life and performance of the coupling (compared to cast steel).

NO MORE RATTLE

SILENTRIDE™ noise dampening is a tough poly insert that eliminates the need for anti-rattle screws.

INVESTING IN QUALITY AND SAFETY FOR NEW ZEALAND'S ROAD USERS

If a coupling is not engaged properly, the trailer could become detached from the towing vehicle with the potential to cause a serious accident.

CM Trailer Parts are committed to providing quality products and we constantly strive to improve the standard and range of our parts.

We have invested heavily in research and testing over seven years to develop a 'new generation' of multifit coupling - one which we believe effectively solves many of the safety issues which can affect your confidence in towing a trailer.

FEATURES

Incorporates SILENTRIDE™ noise dampener, eliminating the need for anti rattle screws.

Automatically selects 50mm or 1 7/8"

Plunger is larger than in other multifit couplings on the NZ market (as at August 2016) meaning better retention of the towball.

Precision machined from SG Iron.

2500kg capacity
